

Task 2 - Systems Integration in Practice 40%

Task 2 - Information

Description

Artefact - Technical and Scientific, and Written Piece

You will be given a case study and will develop an application to suit the case study's functionality needs. You will use tools developed in computer workshops to achieve the application and data integration requirements. Beside the runnable application, you also need to present your design and analysis in the form of a written report. A guideline structure will be provided on Blackboard.

This task is being used for measuring assurance of learning towards Association to Advance Collegiate Schools of Business (AACSB) accreditation. The following Program Learning Objectives will be assessed:

- PLO1.1: Written Communication
 - Demonstrate advanced written communication skills in a business context

Criteria:

- examination of the functionality of the application, its user interface, code structure and readability
 - presentation of a cohesive application
 - design and analysis to suit the case study
 - demonstrate advanced written communication skills in a business context
